

CASE STUDY

2 ALBION GROVE, LONDON
N16 8RG

PROJECT DETAILS

CLIENT:

Masro Group

Project Size:

Roof - 50 Square Metres

Basement – 152 Square Metres

Products Used:

Roof

- Axter Green roof system

Basement

- Newton Cavity membrane system

Work Status:

Completed, June 2020

PROJECT DETAILS

SWS were appointed by Masro to provide a waterproofing solution to achieve a Grade 3 environment for habitable space in the basement. We also provided a Green roof installation to the roof deck.

The development is a new-build 3-storey residential building.

SOLUTION

SWS installed an Axter Force Dalle double layer felt system as the roof deck waterproofing layer with 130mm insulation and green roof finishes.

Newton Cavity membrane and accessories were installed to the basement wall and floor area with cementitious system to the staircase within the basement. All installations were carried-out by SWS in accordance with manufacturer's specifications and the requirements of BS: 8102:2009 for basements.
